

Since a very early age I have been around many animals, most notably cats and dogs. I am a third-generation breeder and alongside with my wife Gem we breed Ragdolls.

In my professional life I have been working as a parts advisor in the motor trade for the past twenty years learning how to deal with customers and general complaints and am currently an acting branch manager.

I have been on the Felis Britannica Show Commision for the past 6 years and would like to carry on in this role.

Thank you

Nick chapman
